## Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## ICPSR PROCESSING NOTES FOR #37070

*Changing Climates of Conflict: A Social Network Experiment in 56 Schools, New Jersey, 2012-2013*

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk:
  - a. ICPSR masked the following variables in the data: **NAME** and **MIGRANT**.
  - b. ICPSR recoded the variables **DIST\_ID** and **SCHOOL\_ID** to replace the unique values with unique randomly-generated integers.
  - c. ICPSR recoded disclosive values in the variables **RTS1W2** and **IDN**, and replaced with “[MASKED BY ICPSR]”.
  - d. ICPSR recoded the following variables into ranges: **WH\_M**, **WH\_F**, **BL\_M**, **BL\_F**, **HI\_M**, **HI\_F**, **AS\_M**, **AS\_F**, **AM\_M**, **AM\_F**, **PI\_M**, **PI\_F**, **MU\_M**, **MU\_F**, **ROW\_TOTAL**, **RAWSIZE**, **POPULATION2011**, **FREE\_LUNCH**, **REDUCED\_LUNCH**, and **LEP**.
  - e. ICPSR recoded the variable **GRADE\_LEVEL** to include an “Other – grade ranges vary” value to capture categories with low frequencies.
  - f. ICPSR recoded the variables **HT** and **HTW2** into ranges of 3 inches, as well as top- and bottom-coded the variables at “53 inches and below” and “Above 68 inches”.
  - g. ICPSR collapsed positive responses for the indicator variables **RECETHME** and **RECETHNA** due to low frequency values. These values were recoded to the value of 1 “Race/ethnicity not included” in the other ethnicity category variable (**RECETHO**). The variables **RECETHME** and **RECETHNA** were then recoded to mask all values, which were replaced with [MASKED BY ICPSR].
2. **Variable Differences:** ICPSR computed three age variables (**AGE\_NEW**, **AGEC\_NEW** and **AGEW2\_NEW**) that contain respondent ages in years (with truncated values to round to the nearest whole age), in order to replace the variables **AGE**, **AGEC** and **AGEW2**, which contain respondent ages in days from a given date; the variables **AGE**, **AGEC** and **AGEW2** were recoded to “[MASKED BY ICPSR]” due to disclosure risk.
3. **Stata Limitations:** Due to Stata limitations, the character variables with non-integer values do not contain value labels within the Stata files.

4. **Undocumented Codes:** The variables **SCHTREAT**, **GENC**, **AGEC\_NEW**, **ACTDW2**, **SMTWW2**, **INSTACW2**, **INSTNW2**, **INSTCMW2**, **DN13W2**, **DNCL6W2**, **DNCL7W2**, **DNCL8W2** and **ID2W2** contain undocumented values which ICPSR has labeled “Undocumented code”. No additional information was provided.
5. **Missing Values:** ICPSR standardized missing values for the dataset with out-of-range codes, in order to distinguish missing values from valid values in continuous variables, and to convert text values to numeric for optimal user experience. ICPSR designated these codes as missing in the dataset. The standardized values are as follows:

Value	Value Label	Description
-55	Other	ICPSR created for values that were out-of-range for the question and did not fit into other categories.
-66	Data missing (Blank in photocopies)	P.I. provided value label. No further information was provided.
-77	Impossible (Capricity coding)	P.I. provided value label. No further information was provided.
-88	Don't Know	ICPSR created for “Don't know” values in variables.
-95	Nom	P.I. provided value label. No further information was provided.
-96	Shifted	P.I. provided value label. No further information was provided.
-97	Duplicate	P.I. provided value label. No further information was provided.
-98	Not applicable	P.I. provided value label. No further information was provided.
-99	Blank/refused	P.I. provided value label. No further information was provided.

## **Changing Climates of Conflict: A Social Network Experiment in 56 Schools, New Jersey, 2012-2013**

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**

## ST5W2: Spend time 5

In the last few weeks I decided to spend time with these students at my school: (in school, out of school, or online) - person 5

Number 1 is for the person you spent most time with, then number 2, then number 3...

You don't have to fill in all the lines! To make it easier, you can write down their initials here, then find their number.

It can be boys and girls!
